intacs® certified Automotive SPICE® Potential Analysis Training

Objective

The Automotive SPICE® Potential Analysis PAM supports the evaluation of the capability of a potential collaboration or partnership (e.g., for supplier nomination). It focuses on engineering and technical areas and is less time consuming than an Automotive SPICE® assessment.

The Automotive SPICE® Potential Analysis PAM is based on Automotive SPICE® and Automotive SPICE® for Cybersecurity. This training explains the Automotive SPICE® Potential Analysis Process Reference and Assessment Model and prepares participants for its application in intacs®- and VDA-accepted potential analysis activities.

Content

- Motivation of the Automotive SPICE® Potential Analysis PAM
- Influence on the intacs® certification scheme
- Introduction and Overview to the Model
- Process Dimension including Guidelines
- Scope of Automotive SPICE® Potential Analysis PAM
- Rating mechanism defined in Automotive SPICE® Potential Analysis PAM
- Performing an Automotive SPICE® Potential Analysis

Target Audience

- Automotive SPICE® assessors who plan to perform Automotive SPICE® Potential Analysis activities.
- Process experts who support internal evaluation and improvement activities.

Duration

- 1 day training, and exam in the evening or next day

Preconditions

- Participants should have several years of professional experience in the automotive industry (e.g., system/software development, project management, quality management, etc.).
- Participants should have knowledge about the Automotive SPICE® PAM.
- In best case, participants should have attended the "intacs® certified Process Expert Automotive SPICE®" training or should have a higher-level certification according to the intacs® assessor training scheme.

Constraints

- Maximum of 12 participants per training.

Exam

- The exam is conducted by the VDA QMC. The use of a webcam is mandatory.
- After obtaining successful result in the exam, the participant must actively apply to the VDA QMC for certification.
